General Index of Articles and Editorials

(COMBUSTION—Vol. 8, No. 1, July, 1936, to and including Vol. 8, No. 12, June, 1937)

EDITORIALS—

		Page
Advice to Engineering Graduates	(May 1937)	15
Behind the Scenes	(Feb. 1937)	21
Canadian Engineers Celebrate Semi-Centennial	(June 1937)	21
Central Heating Prospects	(Jan. 1937)	19
Cinder and Dust Recovery	(Dec. 1936)	15
Coal per Kilowatt-Hour	(Nov. 1936)	21
Distorted Information	(Aug. 1936)	13
Domestic Oil Burners	(Dec. 1936)	15
Economist Compares Steam and Water Power, An	(Mar. 1937)	19
Engineer and Labor Problems, The	(June 1937)	21
Engineering Unemployment during the Depression	(Mar. 1937)	19
Federal Power Commission Rate Survey	(July 1936)	17
Heat Balance Tests	(Apr. 1937)	21
High-Speed Hydrogen-Cooled Turbine-Generators	(Oct. 1936)	17
Hydro Power Abroad	(Sept. 1936)	19
Load Ahead of Capacity Increase	(Jan. 1937)	19
Molybdenum as a Catalyst	(Apr. 1937)	21
Net or Gross Efficiency	(Sept. 1936)	19
New Steam Table Values in the Higher Ranges	(Oct. 1936)	17
New York Power Show, The	(Nov. 1936)	21
Not Class I Welding	(Nov. 1936)	21
Plant Data	(Feb. 1937)	21
Revised Boiler Tube Thicknesses	(Feb. 1937)	21
Stack Discharges Receiving Attention	(July 1936)	17
Station Performance Here and Abroad	(July 1936)	17
Steam Generating Unit Design	(Dec. 1936)	15
Steel Deliveries	(Apr. 1937)	21
"Tailor-Made" Installations	(Oct. 1936)	17
Utility Accidents	(Aug. 1936)	13
Vocational Guidance	(Aug. 1936)	13
Where National Defense Dominates Engineering Thinking	(June 1937)	21
When Shutting Down Mills	(Jan. 1937)	19
World Power Conference, The	(Sept. 1936)	19

ARTICLES—

		Page
Alabama Coals—Their Classification and Analyses. By P. B. Place	(Jan. 1937)	40
Auxiliaries—Steam or Electric Drive? By Theodore Baumeister, Jr	(Mar. 1937)	25
Benson Boiler, The. By Dr. F. Michel	(July 1936)	27
Boiler Baffling Arrangements. By W. S. Patterson	(June 1937)	29
Boiler Code Proposals and Welding Research. By D. S. Jacobus	(June 1937)	35
Boiler Inspectors Meet at New York	(June 1937)	35
Central Station Flow Diagrams	(Jan. 1937) and (May 1937)	25 21
Chlorination of Spray Pond Water, The	(Aug. 1936)	18
Circulation in Water-Tube Boilers	(Oct. 1936)	35
Coal Handling Improvements at the Miller's Ford Station, Dayton, O. By R. D. Gillespie	(Nov. 1936)	41
Combustion Instruments and Control at Hell Gate. By Paul W. Keppler	(Apr. 1937)	29
Creep and Corrosion Discussed at International Congress	(May 1937)	29
Design of High-Pressure Boilers. By E. Lupberger	(Jan. 1937)	33
Developments in Steam Generating Units. By John Van Brunt	(June 1937)	37
Developments in the Battle against Corrosion. By V. A. Rohlin and C. E. Joos	(July 1936)	22
Dust-Prevention Treatment of Solid Fuels. By L. D. Schmidt	(Feb. 1937)	39
Economizer Maintenance	(Nov. 1936)	26
Electric and Water Services Crippled by Flood at Cincinnati	(Feb. 1937)	25
Equipment and Operating Data on the Federal Central Heating Plant. By J. F. Barkley and Charles A. Peters, Jr.	(Nov. 1936)	27
Experience with Combustion Control. By T. E. Crossan and A. J. Matherne, Jr	(July 1936)	35
Fabrication of High-Pressure Drums for Waterside Boilers	(Jan. 1937)	38
Factors in the Design of Superposed Turbines. By H. L. Wirt	(Nov. 1936)	22
Flue Gas Separators. By K. Heinrich	(Feb. 1937)	36
Forced-Circulation Boilers. By H. B. Oatley	(June 1937)	35
Ford to Add Another High-Pressure Unit	(May 1937)	36
Fuel Utilization in New York City. By Arthur C. Stern	(June 1937)	41
Heat Losses in Flue Gases of Stoker-Fired Boilers. By Dr. A. H. Moody and J. A. Harrington	(Nov. 1936)	33
Heater Closures. By George A. Fricke	(Mar. 1937)	31
High-Pressure Installation at Mannheim. By Gerhard Kordes	(Dec. 1936)	16
High Spots of German Power Plant Practice. By Dr. Ing. Otto Schöne	(Oct. 1936)	29
How Engineers May Profit from Patented Inventions. By Leo T. Parker	(Mar. 1937)	37
Incipient Boiler Failures. By D. L. Royer	(July 1936)	31
Kansas and Missouri Coals—Their Classification and Analyses. By P. B. Place	(Apr. 1937)	37
Law as Applied to Trade-Marks and Trade Names, The. By Leo T. Parker	(Oct. 1936)	41
Law of Tools and Equipment, The. By Leo T. Parker	(Dec. 1936)	33
Load Distribution for Best Overall Economy. By E. D. St. John	(Sept. 1936)	30
Maintaining High Standards for Welded Vessels. By A. C. Weigel	(June 1937)	39
Maryland Coals—Their Classification and Analyses. By P. B. Place	(Oct. 1936)	37
Model of Conners Creek Boilers	(Apr. 1937)	36
Modifications of the Hot Process When Conditioning Makeup for High-Pressure Boilers. By C. E. Joos	(Oct. 1936)	32
Newer Methods of Sulphate Determinations and Their Application to Plant Control. By L. Drew Betz	(Sept. 1936)	43
Non-Destructive Testing of Welds. By Dr. Comfort A. Adams	(June 1937)	40
Observations of Flowing Steam. By John I. Yellott	(May 1937)	16
Operation of Large Modern Steam Generating Units. By E. H. Krieg	(June 1937)	37
Paralleling Feed Pumps	(July 1936)	26
Performance of Some American Power Stations	(Sept. 1936)	28
Power and People. By John C. Parker	(Feb. 1937)	22
Power Development in Russia	(Nov. 1936)	39
Power Resources and Practice in Germany	(Sept. 1936)	23
Prevention of Furnace Explosions. By E. G. Bailey	(June 1937)	38
Prevention of Spontaneous Heating of Large Coal Piles. By M. K. Drewry	(Feb. 1937)	28
Problems in Collection and Evaluation of Data for the Design of Steam Generating Units. By B. J. Cross	(Dec. 1936)	23
Production of Electricity and Consumption of Fuels	(Feb. 1937)	32
Random Views of the New York Power Show	(Dec. 1936)	32
Rating and Performance of Stationary Steam Boilers. By W. S. Patterson	(Aug. 1936)	23
Regulation of Feedwater Level in Boilers. By V. V. Veenschoten	(Mar. 1937)	34
Relation of Burning Equipment to Coal Selection. By E. C. Payne	(May 1937)	34
Round Table Conferences	(Oct. 1936)	18
Semi-Outdoor Station Placed in Service	(Aug. 1936)	14
Size Versus Unit Cost of Steam Generating Units	(Oct. 1936)	28
Sodium Sulphite for Removal of Oxygen	(Sept. 1936) and (Nov. 1936)	25 25
Some Factors Influencing Design of Pulverized-Coal-Fired Steam Generating Units. By Otto de Lorenzi	(Feb. 1937)	33
Some High Spots of the A.S.M.E. Annual Meeting	(Dec. 1936)	20
Some Recent Developments in Operation and Maintenance of Surface Condensers. By A. H. Moody	(Aug. 1936)	19
Some World Power Conference Delegates on Tour III	(Sept. 1936)	27
Specific Enthalpy of Low-Pressure Steam, The. By C. Harold Berry	(Apr. 1937)	41
Steam Turbine Regulation and Supervisory Control. By A. F. Schwendner, A. A. Luoma, J. L. Roberts and C. D. Greentree	(Dec. 1936)	29
Steam vs. Hydro Power in France	(Sept. 1936)	46
Superposition at Schuylkill Station of Philadelphia Electric Company. By E. L. Hopping	(June 1937)	22
Tennessee Coals—Their Classification and Analyses. By P. B. Place	(Sept. 1936)	37
Test of Unit No. 5 at Rouge Plant of the Ford Motor Company. By W. W. Dulmage	(Apr. 1937)	22
"Topping" Extension to Omaha Steam Plant. By Louis Elliott	(Sept. 1936)	20

PAGE

Trends and Developments in Industrial Turbines. By E. R. Kauffman. (Jan. 1937) 20
Twenty-Five Years of Power Development. By A. G. Christie... (Apr. 1937) 34
Unusual Boiler Problems Caused by Corrosion. By Cyrus Wm. Rice. (Aug. 1936) 31
Waterside High-Pressure Turbine Nears Completion. (May 1937) 32
Welding High Tensile Strength, Low Alloy Steels. By Dr. J. C. Hodge. (June 1937) 39
Windsor Steam Plant Modernization. By Philip Sporn. (Mar. 1937) 20
World Power Conference. (July 1936) 18

STEAM ENGINEERING ABROAD

Air Blast Pulverizer on Shipboard. (Dec. 1936) 36
Another Unit for Battersea. (June 1937) 45
Battersea Power Station and the Flue-Gas Problem. (Apr. 1937) 43
Boiler Plant Extension at Leicester. (Jan. 1937) 47
Boiler Testing by Chemical Method. (Feb. 1937) 45
Boiler Water Concentration with Loeffler Boilers. (Dec. 1936) 37
British Grid to Add Another 40,000 Kw. (Feb. 1937) 43
British to Erect New Station in Kent. (Oct. 1936) 45
Burning Mixed Coal Sizes on Traveling Grate. (Feb. 1937) 43
Closed-Air System of Transmission. (July 1936) 40
Coal vs. Oil for Merchant Ships. (May 1937) 39
Combustion under Pressure. (Feb. 1937) 43
Data on the Grid. (May 1937) 39
Detecting Cracks at Rivet Holes. (Dec. 1936) 35
Double Return-Tube Boiler. (Nov. 1936) 45
Electricity Supply Progress in France. (Aug. 1936) 37
Experiences in Operation with Slagging Bottom Furnaces. (June 1937) 43
Extension at Nottingham. (Dec. 1936) 35
Filming Combustion of Pulverized Coal. (Mar. 1937) 39
Flow in Steaming Tubes Arranged in Parallel. (May 1937) 37
Forced-Circulation, Once-Through and Natural-Circulation Boilers Compared. (Jan. 1937) 45
Fulham Power Station. (Nov. 1936) 46
Fumes from Battersea Station. (Jan. 1937) 45
German Views on Turbine Types. (May 1937) 40
Heating with Superheated Water. (Mar. 1937) 39
Heat Insulation. (Apr. 1937) 44
Heat Loss with Bare Flanges. (July 1936) 42
High-Pressure Marine Boiler. (Oct. 1936) 45
Increased Electric Output in British Empire. (July 1936) 40
Increased Power for South Africa. (Apr. 1937) 43
Interconnection in France. (Apr. 1937) 43
Kearsley Station. (Jan. 1937) 45
Large Cooling Tower. (Oct. 1936) 44
Large Cooling Tower at Blackburn Meadows Station. (June 1937) 45
Large Ljungström Turbines. (Apr. 1937) 43
Large Paper Mill Power Plant. (Oct. 1936) 45
Low Temperature Carbonization. (Oct. 1936) 44
Manufacture of Lubricants from Coal and Lignites. (Nov. 1936) 46
Material Requirements of the German Boiler Industry. (Apr. 1937) 43
New German Rules for Welded Steam Boilers. (Nov. 1936) 47
New Turbines for Japan. (Mar. 1937) 41
Performance at St. Denis. (Aug. 1936) 36
Performance of British Power Stations. (July 1936) 41
Power from Refuse Destructor. (Aug. 1936) 35
Ramsin High-Pressure Boiler, The. (Oct. 1936) 44
Rotary Economizer. (Nov. 1936) 45
6000-Kw Electric Boiler. (Aug. 1936) 35
Some British Power Statistics. (Nov. 1936) 45
Standby Station Arranged for Instantaneous Starting. (June 1937) 44
Steels for Modern Steam Conditions. (Nov. 1936) 45
Stud-bolt Material for High Temperatures. (Aug. 1936) 35
Superheat Control. (Mar. 1937) 41
Superposed Marine Installation on the Conte Rosso. (June 1937) 44
Tension on Turbine Casing Bolts. (Dec. 1936) 36
Tests on High-Pressure High-Temperature Turbine. (July 1936) 40
"Top" for British Industrial Plant. (Mar. 1937) 41
Treatment of Flue Gases. (Aug. 1936) 36
Tube Changes through Bending. (Mar. 1937) 39
Turbine Experience on the Queen Mary. (May 1937) 38
Waste Heat Installation. (Jan. 1937) 46
Water Softening on the Queen Mary. (Aug. 1936) 37
